Project Guide
Detailed Design

Step by Step Guide

1. Introductory conversation

This chat will be either online or live in your garden/ terrace and is free of charge.

Your story & wishes will be the starting point of a design uniquely fitted for you. It would be great if you could make a moodboard of the atmosphere of a garden you are attracted to. What forms, elements, plant themes speak to you? And how would you like to use the garden?

2. Quotation

Prices of the detailed design depend on the size of your garden or terrace and your wish for custom-made design of elements. My hourly rate for designing is € 85,- and prices for a detailed design start at €425,- for a roof terrace and €765,- for a garden design. These prices are based on Dutch rates and can vary for other countries.

For payment I work with a 50:50 plan. The first payment occurs after agreement on the quote. The second payment after completion of the final design. You will receive the quotation directly after our chat.

3. Measurements and Pictures

After agreement on the quote I provide you a planning of the design proces. You'll receive a guide of how to measure your garden correctly and I'll tell you what pictures I need.

4. Design Part 1 **Concept Design**

I will work out your wishes in 2 concept drawings on scale. These spatial concept designs will be accompanied by moodboards for planting and materials to give you a good impression. If you want I can add a 3d impression, as 2d spatial plans are sometimes hard to understand for non-designers.

We will discuss the concepts online or live. With your feedback I'll start with the next step.

5. Design Part 2 **Final Design**

With your feedback I'll finalize the design on scale. This includes a detailed planting plan including maintenance plan, measurement plan and material plan. If required, custom-made elements are also designed to details, including 3d views and measurements.

We will discuss the final design online or live. Small changes will be made after receiving your feedback to the design. The design is now ready to present to a landscaper for quotation on construction.

6. Design Part 3 **Quotation planting proces + introduction landscapers**

For the hardscape construction of the garden I will connect you with reliable landscapers. I offer you project guidance with these landscapers to be sure the design is built exactly as it was intended.

If possible, I would love to plant your garden with you using organic plants. By joining me in the planting proces you will start connecting to this newly-built living space. Plus I can share my knowledge of maintenance with you. In the quotation of the planting proces you will find the prices of organic plants & hours of planting. My hourly rate for planting is €45,-.
