**Project Guide**  
**Spatial Sketch**

# Step by Step Guide

## 1. Introductory conversation

This chat will be online and is free of charge.

Your story & wishes will be the starting point of a design uniquely fitted for you. The Spatial Sketch is fitting for you if you are a do-it-yourselfer, you like simplicity and don't want to spend huge amounts of money on your garden. The Spatial Sketch is a plan where your wishes & ideas are turned in to a well-balanced spatial plan. Before we start chatting, it would be great if you could make a moodboard of the atmosphere of a garden you are attracted to. What forms, elements, plant themes speak to you? And how would you like to use the garden?

## 2. Quotation

Prices of the Spatial Sketch depend on the size of your garden. My hourly rate for designing is €85,- and prices for a Spatial Sketch start at €510,-. These prices are based on Dutch rates and can vary for other countries.

For payment I work with a 50:50 plan. The first payment occurs after agreement on the quote. The second payment after completion of the spatial sketch. You will receive the quotation directly after our chat.

## 3. Measurements and Pictures

After agreement on the quote I'll provide you with a planning of the design proces. You'll receive a guide of how to measure your garden correctly and I'll tell you what pictures I need.

## 4. Design **Spatial sketch**

With your wishes in mind I will work out 1 sketch drawing on scale. This Spatial Sketch will be accompanied by moodboards for planting & materials to give you a good impression of the space. If you want I could add a 3d impression, as 2d spatial plans are sometimes hard to understand for non-designers.

This sketch does not contain a detailed plan for planting or elements/materials but is a tool where your wishes are put into a spatial plan fitting for the place. With this plan you will be able to construct hardscape elements by yourself.

## 5. Optional **Quotation planting proces**

Once you have constructed the hardscape of your garden I can help you further with planting. If possible, I would love to plant your garden with you using organic plants. By joining me in the planting proces you will start connecting to this newly-built living space. Plus I can share my knowledge of maintenance with you. In the quotation of the planting proces you will find the prices of organic plants & hours of planting. My hourly rate for planting is €45,-.
